### Criteria VII

#### 7.1.3 Clean & Green Campus Environmental Promotional Activities

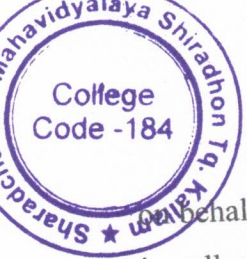

Earth is a home for different living species and we all are dependent on the environment for food, air, water, and other needs. Therefore, it is important for every individual to save and protect our environment. Environment is very sensitive issue in these days. Environment promotion and conservation is the basic policy adopted by our college. Our attempt is create awareness in the minds of student about environment consciousness. Following activities were undertaken by college with the help of Students and teachers.

##### Tree plantation-

The role of the college towards sustainable development of the environment is continuously positive. Every year the college organizes activities related to environment conservation and public awareness through various activities. The college conducts various activities related to tree plantation every year. Between 01st July and 07th July, forest week is organized and various types of trees are planted. Every year, the college plants trees and conserves them under various activities. Every year, the college organizes various lectures and seminars on environmental conservation and protection to create awareness among the students about environment.

##### Collected Waste Material and cleanliness drive-

A clean and green environment is a basic ideology in sustainable development. A whole lot of diseases can be traced back to unhygienic environments and irresponsible waste disposal. The importance of cleanliness is known to all now, yet people try to keep their homes clean while they somehow just forget that they are responsible for the cleanliness of the environment as well, that they are responsible for any waste they generate and that just getting rid of it from their house won't help. It could be due to lack of knowledge or due to sheer laziness. Our college bring students Cleanliness Drives. Through which we make student aware of the importance and methods of handling waste responsibly and try to take a step towards a cleaner environment. Cleanliness campaign is conducted

On behalf of the college. In which students and faculty clean the college premises. Garbage in the area is collected and disposed of properly. Plastic waste, Degradable waste is collected from the college premises. Through such activities, the importance of cleanliness is inculcated in the students.

### **Water Management initiatives**

Water is one of the important Element of life, it should be used carefully and with proper plan. We have planned water management in our campus. The rain water falling in the college premises is stored in a big pit and it is drained there. Collecting rainwater in a large pit and percolating it into the ground helps to raise the water table. Seeing this scene in the rainy season also creates awareness among the students regarding water conservation.

### **Guidance Lectures on Environmental Conservation**

Every year various types of environmental conservation activities like environmental conservation, water conservation, tree plantation, animal husbandry are implemented under National Service Scheme. The main concept of National Service Scheme is water conservation and environment conservation, so various environmental complementary activities are taken up through the said camp and Yearly Program.

### **Other Activity Clean & Green Campus Environmental Promotional Activities**

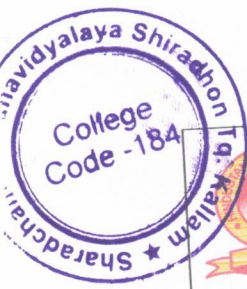

Various environmental conservation and balance activities are conducted the college camp. The college tries to maintain environmental balance by conducting environmental awareness is created among the students through various Guest Lecturer on Environmental Awareness, seminars and project work.
