## Environment Consciousness and Energy Conservation Policy

### Introduction:

Sharadchandra Mahavidyalaya Shiradhon has a spacious campus, of 03 acres having a good infrastructure and spacious playground. Our institution is one of the unique institutions contributing in the Energy Conservation and Environment Consciousness. We do hard efforts for ensuring protection of Environment and Conservation of resources through optimum utilization of environmental resources. We are trying to inculcate awareness and knowledge of all concerned with respect to environment and exercise environment leadership in the local area.

This environment and energy policy is binding for all the components of the institution and applies to all its stakeholders and to the various activities undertaken by the institution. It will help us to embed efficiency and environmental awareness into our everyday activities, thus helping us to realize our responsibilities and commitment to conservation of natural resources and to limit its usage. The Green Club & Environment Advisory Committee, an official platform devoted to the cause of environmental awareness, to undertake green initiatives, and to conduct green literacy programmes to save energy and to protect the environment

### Objectives:

- Planting trees and maintaining natural balance by conserving trees.
- To create environmental awareness among students.
- To maintain and conserve ecological balance within the campus.
- To improve our contribution to climate protection and adaptation to climate change
- To create awareness and enhance use of renewable energy sources.
- To realize our responsibility and commitments to conservation of natural resources and to limit its usage.
- To try to minimize paper use in administration.
- Conservation of resources through optimum utilization.

Enhancing awareness and knowledge of all concerned with respect to environment and natural resources.

### Procedures and Practices

#### A. Energy

- Create awareness among students, faculty members and all relevant stakeholders for efficient use of energy (electricity) on campus.
- To increase use of LED bulbs and tubes.
- As the college building is located in a spacious location, the electricity consumption is low due to the addition of sunlight and ventilation.

#### B. Environment

- To undertake tree plantation campaign in campus and out of Campus every year.
- To develop rain water harvesting and bore well recharging to increase water table level.
- To develop systematic waste management mechanism
- Plastic-Free Campus.
- To create environmental awareness among students.

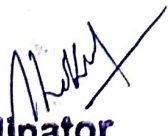

#### C. Water

- To inculcate importance of water conservation amongst the student and teachers.
- Monitor and minimize the water consumption.
- Implementation of innovative water-efficient technologies such as rainwater harvesting and recharging of bore wells
- Promote local plantation to reduce water usage.

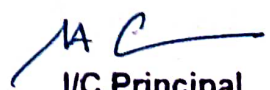

#### D. Waste Management

- Solid Waste Management
- Liquid Waste Management
- E-Waste Management

The Environment and energy policy is binding for all the component of the institution. The various activities undertaken by the institution which will help to increase efficiency and environmental awareness into our everyday life. This policy will help to realize our responsibility and commitments to conservation of natural resources and limit of their usage.
